Hill Technical Solutions, Inc.

Founded in 2010, Hill Technical Solutions provides highly technical support to major government programs for the Missile Defense Agency (MDA), U.S. Army Space and Missile Defense Command (SMDC), U.S. Army Rapid Capabilities and Critical Technologies Office (RCCTO), U.S. Army CCDC Aviation and Missile Center (AvMC), U.S. Army COE (Department of Defense Supercomputing Resource Centers), and the United States Air Force in areas including system engineering, hypersonic technology, cybersecurity, information technology, modeling and simulation, and testing. The Company's expertise includes innovative, dynamic, and forward-thinking engineering support to the United States military dating back to the mid-1980s, through quick response engineering analysis and requirements verification. The Company provides physics-based technical solutions spanning the full spectrum of system engineering; from early concept definition and system requirements development; through preliminary design, detailed design, and product development; to verification through rigorous analysis, demonstration, and testing, the Company works to optimize system capabilities in support of national priorities. Learn more at www.htsi-al.com/.

Owl Cyber Defense

Owl Cyber Defense implements next generation cybersecurity solutions for critical networks. Owl's DualDiode Technology®, a proprietary data diode, boasts over 28 technology patents and has over 2,000 successful deployments globally across intelligence, government, military, utility, energy, and other critical infrastructure networks. Owl's deterministic hardware-enforced technology ensures secure networks and enables the reliable and robust transfer of all data types and file sizes.
